

LEGALETT AIR-HEATED FLOORS

Setting the Standard in Foundation/Heating Systems

- Do you want to **reduce construction** and **energy costs**?
- Do you want **warm floors** and **warm feet**?
- Do you want to promote **healthy living**?
- Do you want **barrier-free** housing?
- Do you want to **eliminate leaking basements**?
- Do you want **frost protection** without frost walls?
- Do you want a foundation for **poor soil conditions**?
- Do you want to **extend your building season**?
- Do you want **radiant heat** without water pipes or wires in concrete?
- Do you want to **eliminate moisture, mildew, mould** and **odour**?
- Do you want a **solution to radon gas problems**?

If so, come and learn about the LEGALETT WAY at

www.legalett.ca

LEGALETT is Much More than Just Floor Heating
LEGALETT is a Building System

We follow the building process from design to installation.

In contrast to other heating systems, we design both the foundation and the heating system as a whole. The migration of dampness and the effects of frost heave are eliminated through proper design.

Due to the unique ability of the LEGALETT System to eliminate frost walls without any chance of foundation movement, tremendous time and money savings are enjoyed when using the LEGALETT System.

LEGALETT air-heated floors can be used in all types of buildings.

LEGALETT COSTS LESS!

LEGALETT Cost Savings Factors Compared to Conventional Construction

- Excavation** - 1/3 cost - simply stripping topsoil - no deep excavation
- Stone Drainage Layer** - 2/3 cost - simply placing 4-6" of clean stone
- Backfill** - eliminated - LEGALETT does not require backfill
- Footings** - eliminated - LEGALETT does not require footings
- Frost Walls** - eliminated - LEGALETT does not require frost walls
- Footing Drainage** - eliminated - LEGALETT does not require footings
- Sump Pump and Pit** - eliminated - slab is above water table
- Additional Underslab Insulation** - eliminated - insulation included
- Heating System** - eliminated - included with LEGALETT
- Additional Engineering** - eliminated - included with LEGALETT
- Operating Costs** - lower - see energy savings discussed below

LEGALETT IS EASIER TO INSTALL!

LEGALETT Installation Steps

- Strip topsoil
- Place gravel drainage layer
- Install underslab services
- Install System
- Pour slab
- Build walls! - **That's it!**

LEGALETT IS COMFORTABLE AND SAVES ENERGY!

With LEGALETT, you are comfortable because:

- Your feet are warm, and your head is cool
- The interior temperature is stable
- There is no mould or mildew to make you sick

With LEGALETT, you save energy because:

- You can lower the air temperature and maintain comfort
- There is hardly any heat loss into the ground
- Heat loss at the ceiling is lower
- You can turn the ventilation system off when there is no occupancy
