

This residence is one of three homes, in a small waterfront development, which was designed with the Legalett Air-Heated “Slab on Grade” system in mind. The southwestern exposure of the great room enhances the effectiveness of passive solar energy gain to the slab.

The mechanical aspect consists of two Legalett water coil heaters, with each heating four independent zones, controlled by means of programmable thermostats.

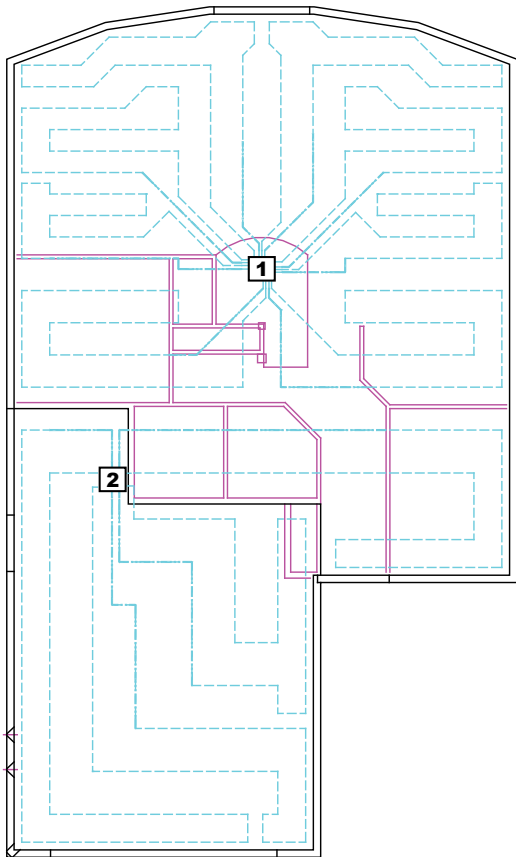

Long term benefits of choosing the Legalett system:

- Lower construction costs
- Reduced heating costs
- Comfortable draft-free radiant heat

Location: ... Cornwall, ON

Installer: Ray-Jans Construction

Heated Slab Area: 2,171 sq. ft.

“ Designed for Comfort, Engineered for Simplicity ”
