

**LEGALETT**

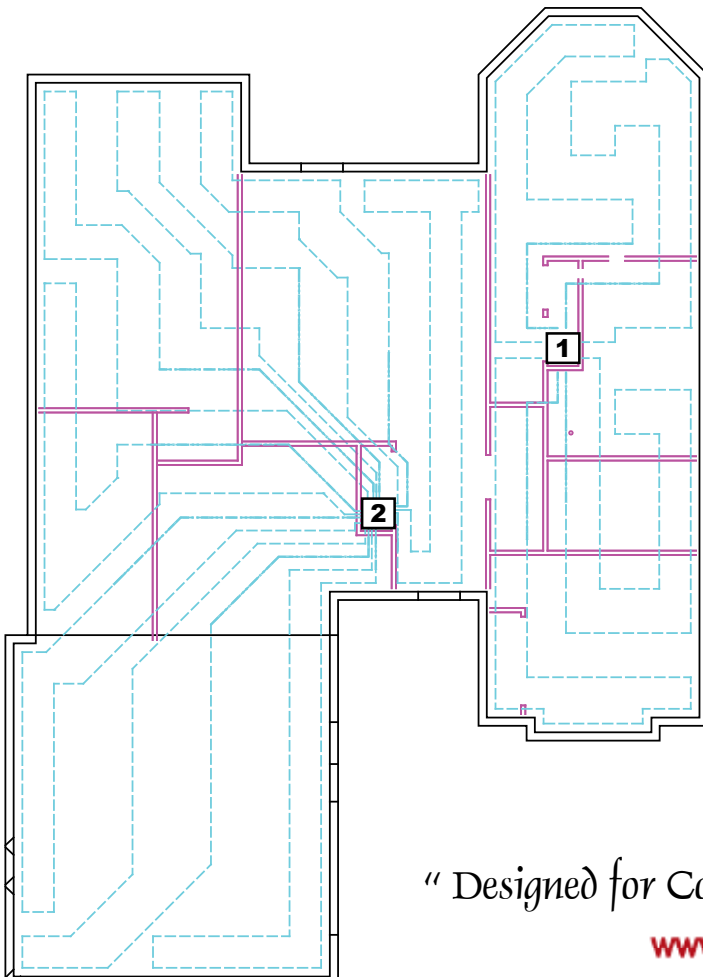

**RESIDENCE - 5201**

This residence is one of three homes, in a small waterfront development, which was designed with the Legalett Air-Heated “Slab on Grade” system in mind. With the Ontario Energy Board’s Smart Meter initiative, homes with Legalett Heated Slabs, such as this one, will benefit from reduced heating costs. The mechanical aspect consists of two Legalett water coil heaters, with each heating four independent zones, controlled by means of programmable thermostats.

Long term benefits of choosing the Legalett system:

- Less construction time required
- No mold or mildew
- Improved indoor air quality
- Comfortable draft-free radiant heat

Location: ... **Cornwall, ON**

Installer: .... **Ray-Jans Construction**

Heated Slab Area: .... **2,312 sq. ft.**
