

LEGALETT

This contemporary home design was laid-out in such a way that would allow the homeowners to maximize their Ottawa River waterfront views. The [GREEN properties](#) associated with Legalett's air-heated Slab on Grade helped the designer and homeowners alike to make Legalett the heating system of choice. Another factor in their decision making was brought on by the Ontario Energy Board's "[Smart Meter](#)" initiative, which will be fully implemented to Ontario properties by 2010.

The mechanical heating aspect consists of three Legalett electric coil heaters, each controlling four independent zones by means of programmable thermostats.

Long term benefits of choosing the Legalett system:

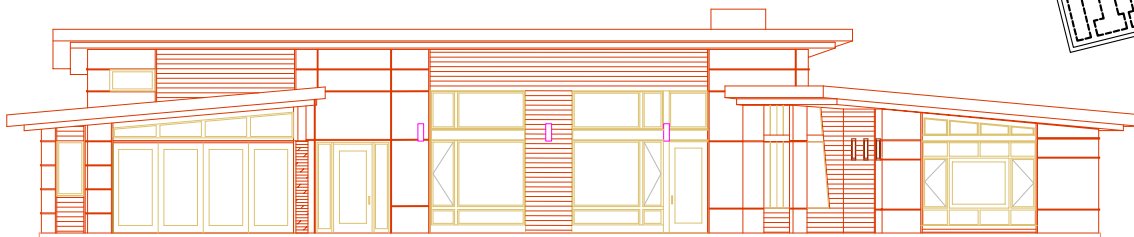

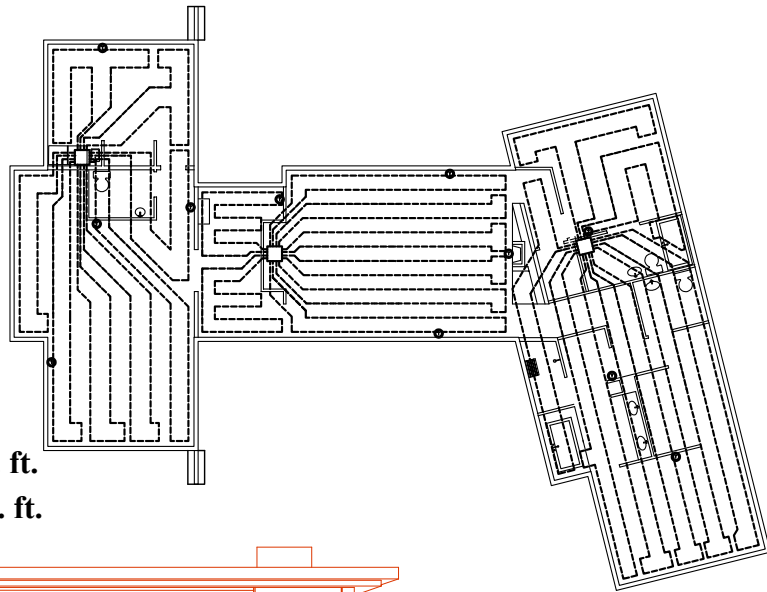

- GREEN aspects of the Legalett concept
- Comfortable heat where it's needed
- Dust free heating with air distribution restricted to closed loops

Location: .. **East Hawkesbury, Ontario**

Sales Rep: **Foam Geometrix**

Heated Slab on Grade Area: ..... **3,870 sq. ft.**

Unheated Exterior Porch Area: ... **150 sq. ft.**

*"Designed for Comfort, Engineered for Simplicity"*
