

This triplex incorporates two three bedroom units and one two bedroom unit. The project consists of one large 5" Legalett designed Frost Protected Air-Heated Slab-On Grade. The pipe layout was designed to distribute heat evenly within each independently metered unit.

The mechanical aspect in each of the units consists of one Legalett electric coil heater, controlling temperatures in four independent zones by means of programmable thermostats.

Long term benefits of choosing the Legalett system:

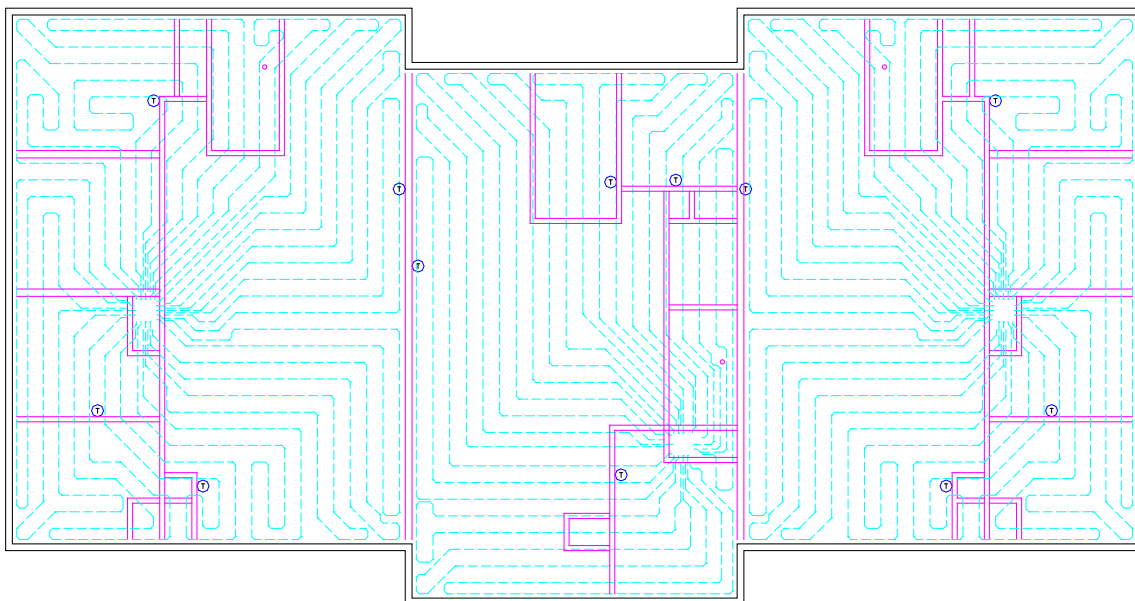

- Reduced overall cost, compared to conventional foundation + heating system installations
- Comfortable warm floors, rather than cold damp floors
- Economical heat storage, matched with Ontario Energy Board's "[Smart Meter](#)" initiative

Location: ... **Bearskin Lake, ON**

Sales Rep: . **KeiGee Sales**

Installer: **McDiarmid Lumber**

Total Heated "Slab on Grade" Area: . **3,364 sq. ft.**
