

ThermalWall PH Panel

Passive House, Zero Net Energy and Green building professionals have often struggled to find a simple and effective insulation panel to augment the exterior wall insulation on new or existing buildings, which is why Legalett Canada came up with the highly effective yet easy to use ThermalWall PH Panel.

The panels come in R-24, R-28 and R-32 configurations and install over any type of wall including ICF, wood, concrete, CMU or steel studs. If you need more insulation than your standard wall assembly provides, ThermalWall PH Panels are the ideal choice.
